MODERN LEARNING

No, you’re not on a real hospital floor – and thankfully so – but no one would fault you for thinking that you were.

That’s because the simulation lab at our Carrington College® Albuquerque campus is designed to look and operate like the real thing – and it does. This incredible learning system is stocked with the equipment that you will be using when you graduate, all in a setting so authentic you can practically hear the ambulances arriving. It’s also equipped with a viewing gallery with flat-screen televisions so you can watch your classmates in action – watch them, that is, when you aren’t participating in exercises yourself.

In-Demand Careers Are Waiting for You

Our campus offers more than just instruction and practice. We provide you the opportunity to work with real patients for hands-on training you simply can’t get in the classroom alone. What’s more, we pride ourselves on a friendly atmosphere, shared among the students, the faculty and the public we serve. It’s a great place to learn and a great place to prepare for the future. If you’re in the area, please stop by and see why we are so enthusiastic about our campus.

Learning Made Fun

The simulation lab attracts a lot of attention on campus, but it’s far from the only hands-on learning tool we offer. Others include:
• Fully equipped science labs
• Labs designed specifically to mirror an actual Physical Therapy clinic

If this sounds interesting to you, just stop by and see for yourself all that Carrington College has to offer. We are conveniently located just west of I-25 on Menaul Boulevard. We have more than 50,000 square feet of learning space specially tailored to our practical training and one-on-one interaction between instructors and students.
