

ASSOCIATE DEGREE IN NURSING

About This Program

Carrington College's Associate Degree in Nursing program trains future nurses to provide health care duties including taking medical histories, recording vital signs and symptoms, performing diagnostic tests, drawing blood, giving injections and more. Registered nurses (RNs) care for individuals, in conjunction with other health care professionals, through the use of the nursing process. Registered nurses work as patient advocates for the care and recovery of the sick and maintenance of their health. In their work as advocates, RNs plan, implement and evaluate nursing care of those who are ill or injured. Graduates are prepared to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).¹

Careers in Registered Nursing²

Registered nurses provide some of the most critical health care available to patients. Whether it's taking medical histories, recording vital signs and symptoms, performing diagnostic tests, drawing blood, giving injections or other tasks, they work in conjunction with other health care professionals to serve the sick or injured. They have a significantly expanded scope of practice, education and clinical education than do licensed practical nurses.

Registered nurses are employed in many different health care settings and perform an incredibly diverse assortment of tasks. Their career path can lead to employment in a variety of health care environments such as:³

- State, local and private hospitals
- Nursing care facilities
- Residential care facilities
- Physicians' offices
- Home healthcare services
- Schools

Knowledge and Skills

Upon completion of the Associate Degree in Nursing program, graduates will be able to:

- Justify a plan of care that provides safe, quality patient centered care to persons throughout the lifespan and across the health/wellness continuum that creates an environment promoting caring and professionalism with consideration for the patient's cultural/societal beliefs and practices.
- Apply scientific evidence-based knowledge to concepts in the care of patients throughout the lifespan and across the health/wellness continuum.
- Validate effective communication and behaviors with healthcare stakeholders that is consistent with the nursing scope of practice and adhering to legal and ethical frameworks.

General Education Coursework

In this Carrington College degree program, students complete technical coursework as well as a broad base of general education course offerings focusing on:

- Communication skills
- English Writing and Composition
- Mathematics
- Science
- Social sciences

¹ Carrington College prepares students to take appropriate certification and licensure exams related to their individual majors. The College does not guarantee students will successfully pass these exams or be certified or licensed as a result of completing the program. Credential preparation varies by location.

² Individuals seeking to enter this career field may be subject to screenings such as, but not limited to, criminal background checks and drug/alcohol testing prior to externship, to attain occupational licensure/certification or employment, and throughout their careers.
