

PRACTICAL NURSING

About This Program

The Practical Nursing program is designed to help students acquire a command of the knowledge and skills necessary to pursue entry-level employment as a licensed practical nurse under the guidance of a registered nurse or a licensed physician or dentist. Graduates are able to provide care for clients experiencing common, well-defined health problems. The program provides a foundation for the continued learning necessary for success as a practical nurse. The program's combined academic and clinical training prepares students to take the National Council Licensure Examination for Practical Nurses (NCLEX- PN).¹

Careers in Practical Nursing²

Licensed practical nurses are generalists who care for patients and work in many health care areas. They provide basic bedside care, measure and record patients' vital signs and assist with bathing, dressing and personal hygiene in nursing homes, physicians' offices or in patients' homes. In nursing care facilities practical nurses can help evaluate residents' needs, develop care plans and supervise the care provided by nursing aides. In doctors' offices and clinics, their range of responsibilities may include office-related duties. In the home health care setting practical nurses often prepare meals, assist in feeding patients and teach family members simple nursing tasks.

Carrington's Practical Nursing certificate program prepares students for entry-level employment under the guidance of a registered nurse or licensed physician/dentist in a variety of health care settings such as:

- Nursing and residential care facilities
- State, local and private hospitals
- Home healthcare services
- Physicians' offices

Knowledge and Skills

Upon completion of the Practical Nursing program, graduates will be able to:

- Implement a plan of care that provides safe, quality patient centered care to persons throughout the lifespan and across the health/wellness continuum that creates an environment promoting caring and professionalism with consideration for the patient's cultural/societal beliefs and practices.
- Apply knowledge to concepts in the care of patients throughout the lifespan and across the health/wellness continuum.
- Demonstrate effective communication and behaviors with healthcare stakeholders that is consistent with the practical nursing scope of practice and adhering to legal and ethical frameworks.

Coursework

Students in this certificate of achievement program complete technical coursework as well as general education course offerings focusing on:

- Mathematics
- Basic anatomy and physiology
- Medical terminology
- Social sciences

The program culminates in a Certificate of Achievement.

¹ Carrington College prepares students to take appropriate certification and licensure exams related to their individual majors. The College does not guarantee students will successfully pass these exams or be certified or licensed as a result of completing the program. Credential preparation varies by location.

² Individuals seeking to enter this career field may be subject to screenings such as, but not limited to, criminal background checks and drug/alcohol testing prior to externship, to attain occupational licensure/certification or employment, and throughout their careers.
