

## About This Program

Respiratory care practitioners use their knowledge and expertise under the direction of a physician to bring relief to patients with breathing impairments. The program covers knowledge of anatomy and physiology of cardiac and respiratory systems and biochemical and cellular functions of the human body, as well as knowledge of the general principles of pharmacology and cardiopulmonary drugs including knowledge of indications, doses, calculations, mechanisms of action and adverse effects. Students who successfully complete the RC program are eligible to sit for the National Board for Respiratory Care (NBRC) credentialing exams, which include the Therapist Multiple-Choice (TMC) exam and the Clinical Simulation Examination (CSE)<sup>1</sup>.

## Careers in Respiratory Care<sup>2</sup>

Practicing under the direction of a physician, respiratory therapists perform therapeutic respiratory treatments and diagnostic procedures. They are required to exercise considerable independent clinical judgment in the care of patients with breathing or other cardiopulmonary disorders. Respiratory therapists (respiratory therapy technicians) consult with physicians and other health care professionals to help develop and modify patient care plans.

There are a number of possible paths that you could follow as a qualified respiratory therapist. You can seek employment in health care settings, such as:

- Hospitals
- Physicians' offices
- Home care
- Nursing care facilities
- Assisted living facilities

## Knowledge and Skills

Upon completion of the Respiratory Care program, graduates will be able to:

- Differentiate the skills and knowledge to perform entry-level respiratory care therapy in a variety of patient care settings.
- Utilize appropriate communication strategies to support data collection, intervention, and patient/client response.
- Demonstrate ethical behavior consistent with state laws and regulations related to privacy and safe practices.

<sup>1</sup> Carrington College prepares students to take appropriate certification and licensure exams related to their individual majors. The College does not guarantee students will successfully pass these exams or be certified or licensed as a result of completing the program. Credential preparation varies by location.

<sup>2</sup> Individuals seeking to enter this career field may be subject to screenings such as, but not limited to, criminal background checks and drug/alcohol testing prior to externship, to attain occupational licensure/certification or employment, and throughout their careers.

## Technical Coursework

The Respiratory Care program covers medical terminology, patient assessment, a variety of respiratory therapies, ventilation concepts and applications and case analysis and management. Students gain hands-on experience at approved health care facilities during clinical rotations.

Students may also need to meet admission and/or progression requirements, including drug screening and background checks.

Carrington's academic catalog, available at [carrington.edu/catalog](http://carrington.edu/catalog), provides the most current and detailed program information, including admission and graduation requirements.

# RESPIRATORY CARE

Campus Based: Las Vegas, Phoenix and Pleasant Hill

## Respiratory Care Campus-Based Program Requirements
